## Celebrating a Decade of Knowledge!

In 2022 Orbis Systems celebrates its 10-year journey as a strategic testing partner and an innovative technology provider. Before embarking on our anniversary year, we wish to recap on topics that we envision to be relevant next year too!

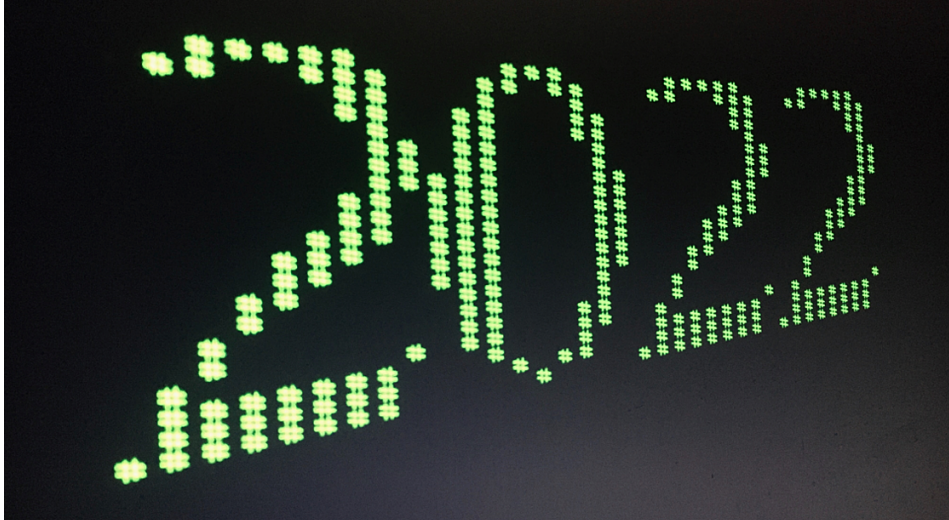

## Ready-to-Use OTA Chambers Ensure Safety

After a very unusual 2020, many expected 2021 to be smoother sailing. However, this past year has shown that the need to adjust to special circumstances remains as dire as ever and ensuring the health and safety of personnel as well as avoiding costly stoppages are still critical issues in manufacturing and R&D environments.

Thanks to their turnkey nature, Orbis Systems' ready-to-use 5G OTA chambers have proved to provide a perfect solution for pandemic-proof testing!

## Customized Solutions in Growing Demand

With the rapid implementation of new technologies it is becoming increasingly clear that there are no one size fits all testing solutions. Delivering customer-specific solutions is practically second nature to Orbis Systems – this could mean anything from building a solution from scratch to customizing an existing platform based on demands set by factors like industry, company, product and testing environment.
